

About My Summer Vacation

When I would think back about my summer vacation. There are lot of mixed ~~memory~~ memories that come to my mind. One memory that I really cherish is when I go and have a stay over at my aunts house.

~~That house~~
I have alot of fond memories on the time that I have spent there. The main reason for me wanting to pay a visit was to go see my cousins and play with them. When I go, there is a river & small canal behind the house which I always love to jump in and have fun. The memories that I have of the place is its have so many trees around the house which makes it a beautiful place to stay. And when about the river have memory of catching fish. Now its like a memory of my past self which I cannot

relive again. As the canal have been
polluted and the place that I have loved so
much as changed. But the loving memories
that I have about that place will never
be forgotten. Its a memory that I cherish
So much about my childhood.
